

Commercial maintenance: what we cover

Routine visit tasks may include:

- Lawn mowing and edging to keep grass areas neat and safe
- Weeding and cultivation of borders and planters
- Pruning of shrubs and small to medium trees
- Seasonal leaf clearance and debris removal
- Blowing and sweeping of hard surfaces, entrances and paths

Seasonal and improvement works can include:

- Seasonal bedding or simple planting refreshes to keep entrances welcoming
- Top-dressing, feeding and overseeding tired lawn areas
- Reshaping or reducing established shrubs and trees
- One-off garden or courtyard clean-ups before events, inspections or handovers

Health, safety and access:

- Use of appropriate PPE and safe working methods for powered equipment
- Careful management of cables, tools and machinery around staff and visitors
- Respectful parking and equipment loading to minimise disruption

Communication and reporting:

- Clear agreement on visit frequency and core tasks (e.g. fortnightly or monthly visits)
- Simple visit notes or photos where useful, especially after improvement works
- Flagging issues early – for example, drainage problems, failing plants or surface damage

Every site is different – we'll agree a clear specification, visit frequency and reporting level to suit your organisation.
